

APPLICATION FOR INDIVIDUAL USE OF RADIOACTIVE MATERIAL
Indiana University – Bloomington

Name: Ariel Smyrichinsky	Department: physics
E-mail Address: arismyri@iu.edu	Campus Phone #:
Birth Date: 02.24.2006	Principal Investigator: W. M. Snow

1. Specify the types and quantities of radioactive materials for which approval is requested.

<u>Nuclide</u>	<u>Form</u>	<u>Maximum Activity per Experiment</u>
22Na	plastic encapsulation	10 microCuries

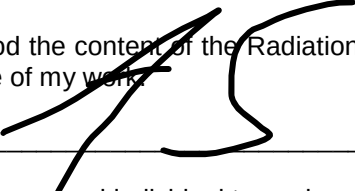

2. List the name, date, duration, and location of formal training (including courses) you have received pertaining to radiation safety or radioactive material use (include the orientation session, training slides, and written material provided by Indiana University).

PHYS-P 451 lab training
 Canvas training
 SW 014 training for LLUR on 09.08.2026 at 10:00 AM

3. Describe the type, duration, and location of any experience you have in working with radioactive material (indicate the maximum amount of specific nuclides used).

PHYS-P 451 lab; handled Co-60 and Na-22 for an experiment
 PHYS-P 309 lab; handled Co-60 and Nickel for an experiment

I have read and understood the content of the Radiation Safety Manual and agree to observe the rules it contains during the course of my work.

Applicant's Signature  Date 09/24/2026

I hereby approve the above named individual to work on my currently authorized project involving the use of radioactive material. I will provide training appropriate for this individual's duties and adequate supervision to ensure that all university radiation safety rules are observed during his/her work.

Principal Investigator Signature _____ Date _____

Submit application to: **Radiation Safety Office**
